## Daily Report

### Sector Rotation

*Relative Rotation Graph vs SPY — equal-weighted across each industry's constituents (up to 50; fewer where yfinance lists fewer — breadth, not mega-cap dominated).*

- **Quadrant** —  Leading (strong & still rising) ·  Improving (weak but turning up — *early rotation in*) ·  Weakening (strong but fading) ·  Lagging (weak & falling).
- **RS-Ratio** — relative-strength **level** vs the market (>100 = outperforming).
- **RS-Mom** — relative-strength **momentum** (>100 = that outperformance is accelerating).
- **Breadth** — % of constituents above their 50-day MA (participation; confirms a move is broad, not one name).
- **1W / 1M / 3M** — equal-weighted % price return of the constituents (context).
- **Δrank** — move up/down this leaderboard since the previous report ( ▲ climbed,  ▼ fell, • <2 / unchanged,  new). Ranking is size-adjusted, so thin baskets (uranium, quantum) aren't ranked on a few names' noise.

## High conviction, pulling back

Strong chatter quality (🟢) + catalyst, but sentiment is weak/negative (name is dipping). Watch for the turn back up.
